## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 11 is objected to because of the following informalities: the claim recites the limitation "the actuating rod" in line 3. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,944,429 to Bishop et al.

Bishop shows a dispenser head 12, an inner body 36 fix to a dispensing device in a non-removable manner and having a shoulder as seen in Fig. 1, a separate outer body 22 fix to the inner body in a removable manner. The outer body defines an actuating surface 54, a frustoconical section, fixing means and a cap 24.

### ***Allowable Subject Matter***

4. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3754

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knickerbocker shows a variable restrictor for a manually actuated pump. Cater fluid pump dispenser for pharmaceutical use. Bougamount shows a sprayer nozzle with closing membrane. Brunet shows a pusher and case assembly with a guarantee system. Brulle shows a spray head.
